

# Your Full Name

City, India | your.email@example.com | +91-XXXXXXXXXX

GitHub: github.com/you | LinkedIn: linkedin.com/in/you | Portfolio: yoursite.com

## Profile Summary

Self-driven engineering student focused on building and deploying full-stack applications with real-world infra. Experienced in the MERN stack, DevOps pipelines, and system automation, with a strong foundation in DSA and problem-solving. Passionate about clean code, scalable deployments, and continuous learning.

## Projects

### DevOps Portfolio CI/CD Pipeline

- Designed & deployed a personal portfolio with GitHub Actions + Docker + AWS EC2.
- Set up auto-deploy workflow (CI/CD) with GitHub Actions and PM2.
- Configured NGINX as reverse proxy; monitored uptime with UptimeRobot.

*Tech: GitHub Actions, Docker, AWS EC2, NGINX, PM2*

### Taskify - Full-Stack Kanban App

- Built a drag-and-drop task board with user authentication and real-time updates.
- Backend with REST API using Express + MongoDB Atlas.
- Containerized with Docker and deployed using Render.

*Tech: React, Node.js, Express, MongoDB, Docker*

### ResumeRanker - Resume Parser + Score API

- Created an API that scores resumes based on job keywords using Node and Python NLP.
- Built a dashboard to upload resumes, display visual scores, and offer keyword suggestions.

*Tech: Node.js, Express, Python (NLP), MongoDB*

## Competitive Programming

- Solved 300+ problems on LeetCode, GFG, and Codeforces.
- Consistently ranked in top 10-15% in contests.
- Strong understanding of arrays, trees, graphs, dynamic programming, and sliding window patterns.

## Skills

- Languages: JavaScript, TypeScript, Python, C++, Bash
- Frontend: HTML, CSS, JavaScript, React, Tailwind CSS
- Backend: Node.js, Express.js, MongoDB, PostgreSQL
- DevOps & Cloud: GitHub Actions, Docker, AWS EC2, NGINX, PM2, Terraform (basic)
- Tools: Git, Postman, VSCode, Render, Netlify, Figma
- Soft Skills: Self-driven, strong communicator, fast learner, project-oriented

## Education

B.Tech in Computer Science

Your College Name, City

Expected Graduation: 2027

### **Achievements**

- Completed 100+ DSA problems in 45 days (Striver A2Z & LeetCode 75)
- Built and deployed 3 full-stack apps with CI/CD pipelines
- Ranked top 10 in internal hackathon / open-source sprint

### **Extras**

- Posting DevOps/MERN learnings weekly on LinkedIn
- Built a Notion system for learning + project documentation
- Exploring DevOps certifications and AWS hands-on bootcamps
